

GETTING STARTED GUIDE

FOR CLOVER STATION & MOBILE

Welcome to Seed Digital Menu

Welcome to Seed Digital Menu by ITsoft and thank you for downloading Seed. We want you to know that we are here to help your business. If there are ever any questions, suggestions, or if you just need a little help, we are here to help. Feel free to call us or shoot us an email and our dedicated team will help in any way possible.

In this “getting started” guide, we will review the basics of what is needed to start using Seed Digital Menu. There are more help assets on YouTube. Just search for Seed Digital Menu and you will have access to an entire library of help videos

In this guide we will review:

- ❑ Installation
- ❑ Clover Settings
- ❑ Building a Table Map
- ❑ Setting Your Menu's
- ❑ Menu Items
- ❑ Creating Discounts, Voids, and Promotional Codes
- ❑ Adjusting Employee Roles
- ❑ Creating Custom Tags
- ❑ Setting Tax Rates
- ❑ Setting Custom SMS messages

Installation Process

After you download Seed Digital Menu and open the app for the first time, Seed will begin the installation process. During this process we are importing:

- ❑ Menu
- ❑ Menu Items
- ❑ Employee Names & Roles
- ❑ Discounts
- ❑ Tables & Seating Groups

This process is completely automated! All you have to do is open the app and let it start.

Seed Installation

Registration Code

You should have received an email containing your registration code and some helpful getting started links. **This email is sent to the email address associated with the merchant ID.**

Each time you install Seed on a new device, you will need to enter this registration code. If you lose the code, use the link to obtain the code or contact support at support@seeddigitalmenu.com.

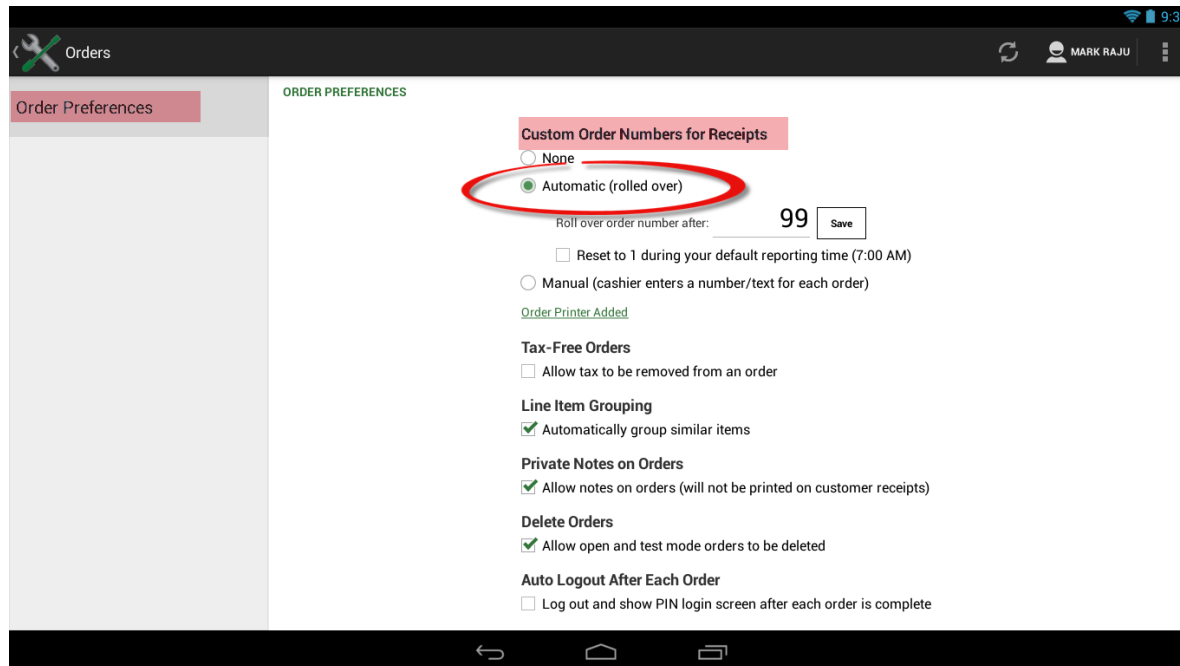

The registration code allows ITsoft to know what devices are being used allowing us to provide better support and to help us develop the apps you need to make your business easier to run.

Clover Settings

Before you can begin using Seed, you will need to make a few adjustments in your Clover Settings. (This may need to be done on each device using Seed)

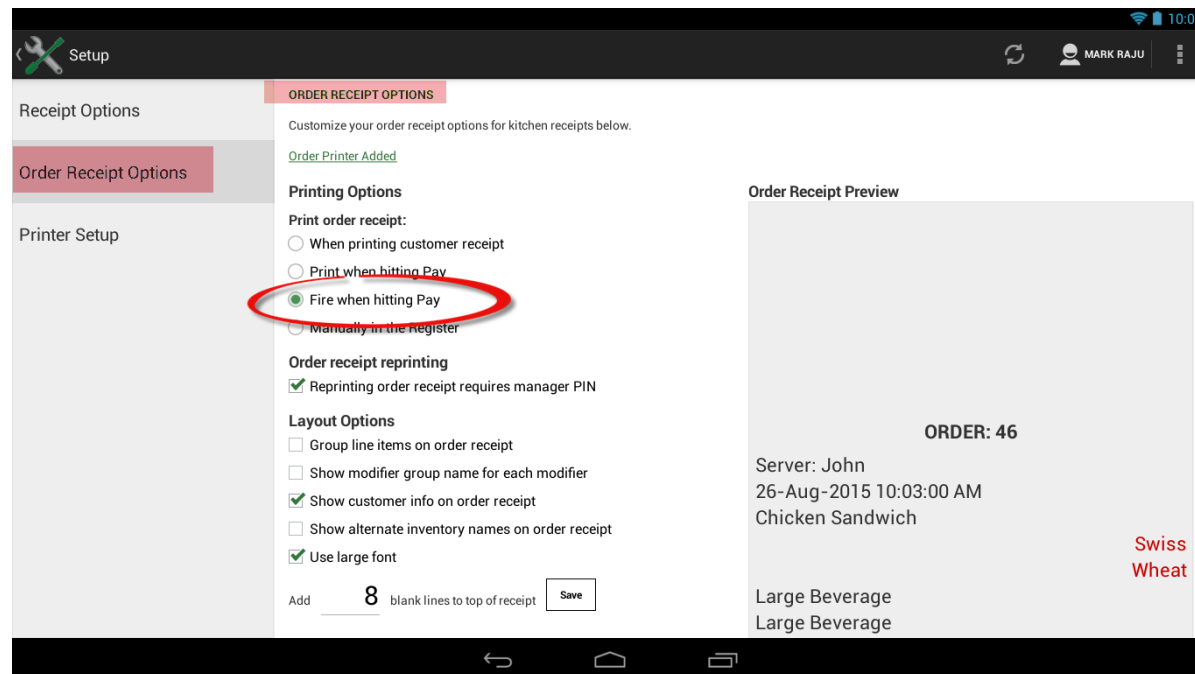

1. Open the **Setup App** on your Clover.
2. Tap on the **Orders** tab
3. Under Custom Order Numbers for Receipts:
 1. Make sure **Automatic (rolled over)** is selected.

Clover Settings

Before you can begin using Seed, you will need to make a few adjustments in your Clover Settings.

1. Go back to the first page in the Setup App and choose **Receipts**
2. Choose the second tab labeled **Order Receipt Options**
3. Under Print Order Receipts, select **Fire When Hitting Pay**

Seed Manage Site

Once you have completed the Clover Settings, you are ready to begin building your Table Map, enhancing your menus, and many other features.

On your PC or laptop visit: www.seeddigitalmenu.com/manage

Because there are certain features that work best on a PC or a laptop, **it is NOT recommended you access this on a Clover device.**

To login, use the email address & Clover pin that can be found in the Clover Employees App. Keep in mind, **only employees with the role of a Manage or an Admin will have access to the site.**

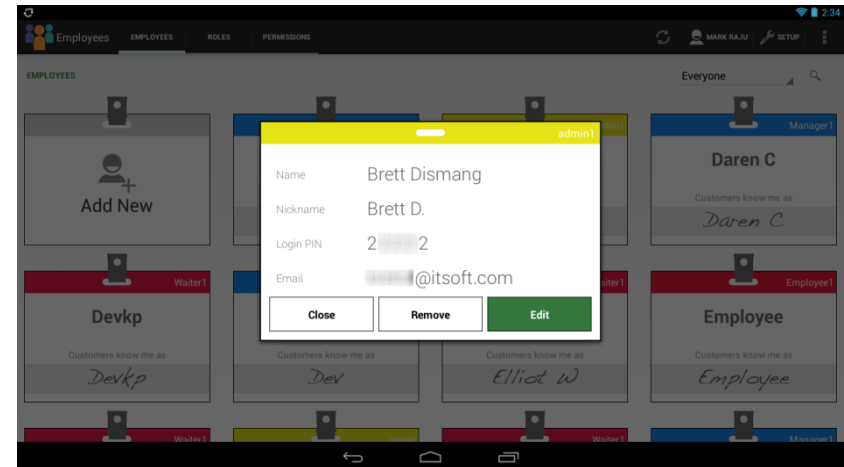

Table Map Designer

The Table Map is one of the most important features of Seed Digital Menu. With a custom Table Map, your restaurant will be more organized than ever. Here you can create new tables, barstools, walls & other objects.

Table Map Features:

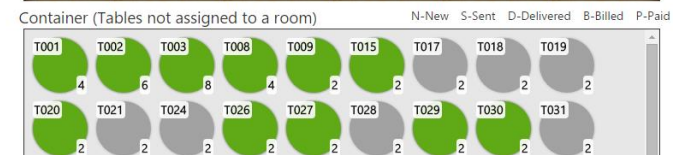

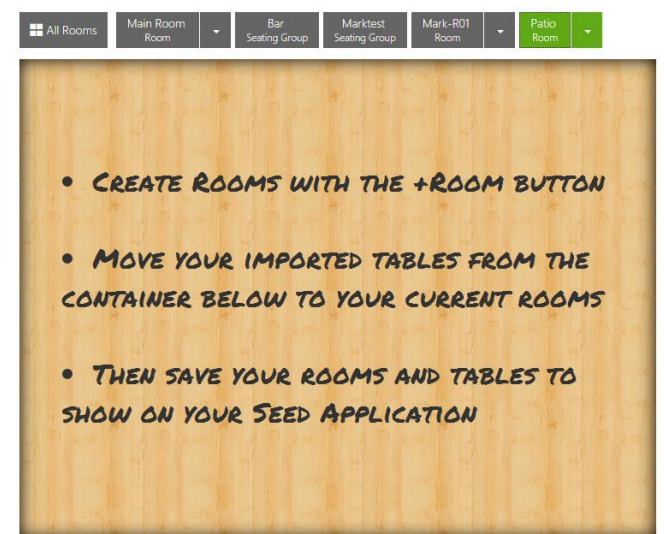

- ☐ Create multiple rooms
- ☐ Custom view
- ☐ Add and remove tables
- ☐ Choose from many floor and grid styles

***All tables imported from the Clover Tables App will be found in the container below the table map room. Drag your tables from the container and place in the desired room.**

Table Map Designer

On the Table Map Designer, adding new tables is a breeze. Simply drag your table to the desired location and drop it. Any table created in the Table Map Designer will also be added to the Clover Tables App.

Menu Setup

Seed Digital Menu imported your current menu from Clover. This can be found by tapping the **Menus** button on the left-hand side of the Manage Site.

Here you can edit details such as scheduled times, active date ranges, special event menus and more.

Your initial menu will be called your default menu and active for all times. To edit the times and dates, use the edit button.

<div> ↓ Default (1 menus) <div> + New Menu Rename Delete </div> </div>				
Name	Active Week Days	Default	Edit	Delete
Default Thu Jan 1 thru Thu Dec 31 00:00:00 to 23:59:59	<div> <div>Mon</div> <div>Tue</div> <div>Wed</div> <div>Thu</div> <div>Fri</div> <div>Sat</div> <div>Sun</div> </div>	<div> <input type="checkbox"/> <div>Manage Menu Items →</div> </div>	<div> <input type="text"/> </div>	<div> <input type="text"/> </div>

Menu Setup - Subcategories

Our next step is to create your menu subcategories. To access this, click the button labeled **Master Item List**. This will bring you to all your menu items and categories.

Menus 

The Master Item List allows you to:

- ☐ Create/Edit Categories
- ☐ Create/Edit Subcategories
- ☐ Create/Edit Menu Items
- ☐ Prices & Scheduled Prices (lunch/happy hour)
- ☐ Pictures, Descriptions & Nutrition
- ☐ Apply Taxes and Select Printers

+ New Category + New Item								
Item	Category	Base Price	Tags	Sort	Edit	Delete		
 Appetizers APP	APP	\$0.00		3				
 BBQ Shrimp BBQ SHRIMP	APP	\$15.00		1				
 Bruschetta Bread BRUSCHETTA BREAD	APP	\$12.99	POP Appetizers	2				
 Cheese Fries CHEESE FRIES	APP	\$12.99	Appetizers	6				
 Chicken Wings CHICKEN WINGS	APP	\$10.90	spicy	5				
 Coconut Shrimp COCONUT SHRIMP	APP	\$12.99	seafood Appetizers	7				
 Crab & Avocado Stack CRAB & AVOCADO STACK	APP	\$12.99		8				

Menus - Subcategories

To create a new subcategory, tap the button “+ New Category.

+ New Category

Next you will need to give the category a name and a short name. The short name is how the category will appear on your order. So for Beverages, you might give it a short name of “BEV.”

Next you need to choose what category you want it to be in. If your subcategory is Beer, then you would select your Beverage or Drinks category.

New Category

Name

LIQUOR

Short Name

LIQ

Category

BEVERAGES

+ Create and Open

✕ Cancel

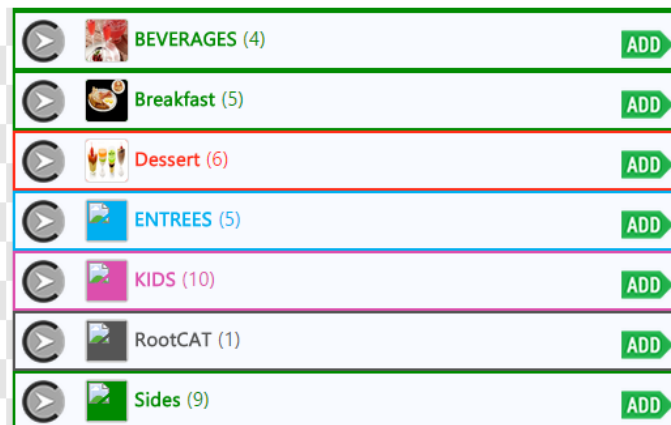

***Creating a new main category is done the same way. When you choose your category from the dropdown box, choose “Main Category.”**

Menus – Menu Item Tree

The Menu Item tree is where you can assign categories to specific menus and choose the order categories and items are shown on the Seed app. You will notice there are two different trees.

- The tree on the left of the screen are all menu categories and items. These are organized by alphabetically.
- The tree on the right will show what categories and items are on the selected menu.

**LEFT SIDE SHOWS ALL
CATEGORIES AND MENU ITEMS**

**RIGHT SIDE SHOWS ONLY CATEGORIES AND
ITEMS ON THE SELECTED MENU**

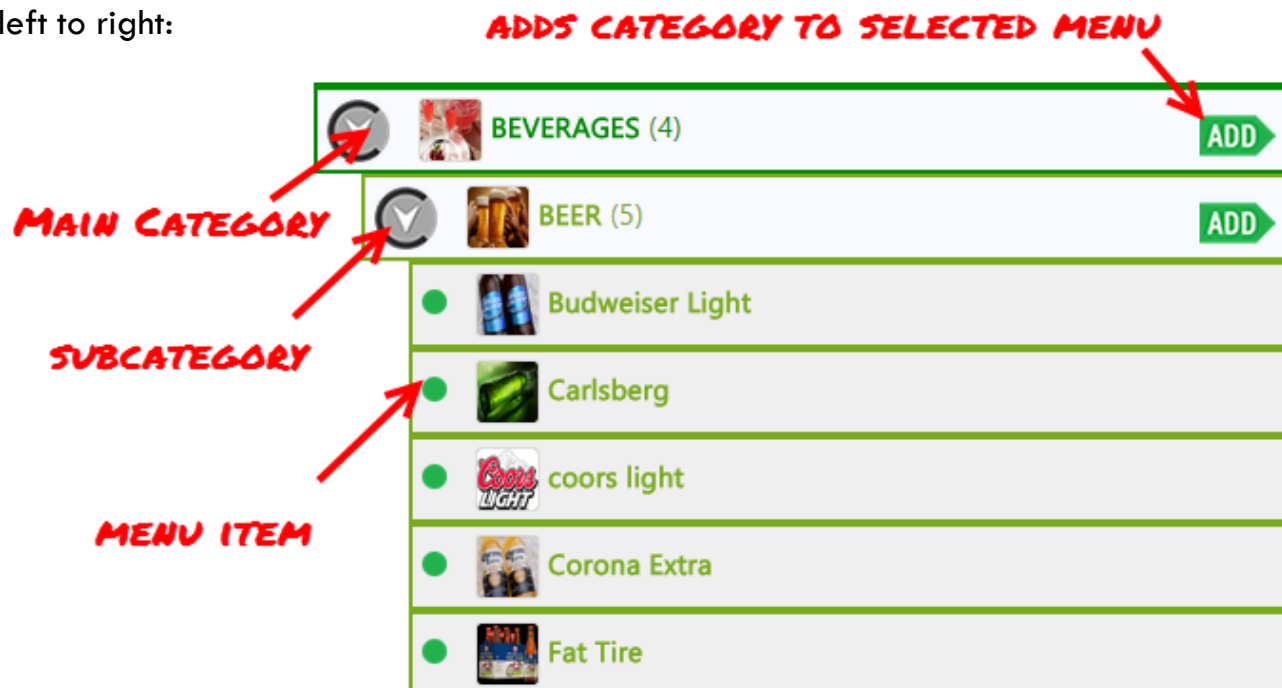

**HOLD AND DRAG TO REARRANGE WHAT
ORDER THESE ARE SHOWN ON THE SEED
APP**

Menu Setup – Menu Item Tree

The menus are set up in a “Tree” format. This means the highest level will be the furthest left.

Order of levels from left to right:

- Main Category
- Subcategory
- Menu Item

Menu Setup – Menu Items

With Seed Digital Menu, you have more control over your menu items than ever before. Quickly edit all details of each menu item from one screen. To edit an item, tap the edit button next the to the menu item in the Master Item List

- ☐ Create Short Names
- ☐ Add custom tags to any item
- ☐ Select taxes
- ☐ Choose between fixed & variable pricing
- ☐ Declare if an item has alcohol of not
- ☐ Select menus and special pricing

 Item	Bruschetta Bread BRUSCHETTA BREAD	APP	\$12.99	POP Appetizers	2		
 Item	Cheese Fries CHEESE FRIES	APP	\$12.99	Appetizers	5		
 Item	Chicken Wings CHICKEN WINGS	APP	\$10.90	spicy	5		

Menu Setup – Menu Items

The menu item details page allows you to control all aspects of your item.

- ❑ Choose category/subcategory
- ❑ Adjust base price and menu prices
- ❑ Apply custom search tags
- ❑ Apply tax rates
- ❑ Choose printers
- ❑ Quickly apply item to multiple menus

*Child questions are “responsive modifiers.” When you add a child question to a modifier option, you are enabling a secondary modifier to appear when selected. So if you have a child questions applied to the option of a baked potato, then when the baked potato is selected, you can have a modifier appear asking what toppings you would like on your baked potato. These are created the same way as modifier.

Menu – Creating Modifiers

Modifiers can be created, modified, and deleted from the Menus tab. Just select “Menu Item Modifiers” at the top of the page. All Modifiers will be listed in a list format.

Create Modifier: At the top of your modifier list, you will see the button labeled “+New Modifier. Tap this to create a new modifier. Once tapped, your modifier’s properties page will appear. Once you have created a modifier, it can be added to any menu item or even as a child question for an existing modifier.

Menu – Creating Modifiers

Once the Modifier Detail page opens, you will be able to enter the basic properties for this modifier.

- ❑ **Modifier** – This is the official name of the modifier.
- ❑ **Short Name** – This is how the name of the modifier will appear on the order form.
- ❑ **Modifier Type**
 - ❑ **Required** – This means a selection must be made for this modifier.
 - ❑ **Optional** – This means that the modifier is not required for the item to be ordered.

New Modifier

Modifier	<input type="text" value="Cook Temperature - BEEF"/>
Short Name	<input type="text" value="Cook Temp"/>
Modifier Type	<input checked="" type="radio"/> Required <input type="radio"/> Optional
Multiple Choice	<input type="checkbox"/>

- ❑ **Multiple Choice** – When turned on, this gives the ability to choose more than one option. When turned off, it will allow only one option to be selected.

Menu – Creating Modifiers

To add options to your modifier, tap the button . This will bring you to your options detail page. Here you can enter the details for the new option. Repeat this step for each additional option.
